

Making magazine or newspaper coils.  
2 Methods

1. Cut in 1" strips fold edges into the centre and then fold in half along the centre.
2. Cut strips 2 1/2" wide ( you can experiment which width works best for you). With a knitting's needle or toothpick, start at one corner on a slight angle and start rolling it up into a tube, glue the end.

You can make jewelry, bowls, boxes....

Glue as necessary, even varnish at the end.
